

QObject

Ms::MTest

TestImportMidi

```
classDiagram
    class QObject
    class Ms_MTest["Ms::MTest"]
    class TestImportMidi
    TestImportMidi --> QObject
    TestImportMidi --> Ms_MTest
```

The diagram illustrates a class hierarchy where 'TestImportMidi' is a base class for both 'QObject' and 'Ms::MTest'. A horizontal line connects the two top boxes, with a vertical line descending from its center to the top of the 'TestImportMidi' box. From this vertical line, two arrows point upwards to the bottom of the 'QObject' and 'Ms::MTest' boxes, indicating inheritance.
