

QObject

Ms::MTest

TestSelectionRangeDelete

```
classDiagram
    class QObject
    class MsMTest["Ms::MTest"]
    class TestSelectionRangeDelete
    TestSelectionRangeDelete --|> QObject
    TestSelectionRangeDelete --|> MsMTest
```

The diagram illustrates a class hierarchy where the `TestSelectionRangeDelete` class inherits from both the `QObject` class and the `Ms::MTest` class. This is represented by two arrows originating from the `TestSelectionRangeDelete` box and pointing to the `QObject` and `Ms::MTest` boxes, with a vertical line connecting the arrows at their base.
